Product description

Nestable plastic pallet 120x80 cm on 9 legs. Made from one piece of HDPE plastic, which makes the pallet light and strong. The static load is 2500 kg. The static load is the maximum load when placed on a flat surface. The dynamic load is 1000 kg. The dynamic load is the maximum load during transport. In both cases with an even distribution. If several pallets are stacked, the total weight determines the load on the bottom pallet. Easy to rinse clean.
