

Technical information

Productnumber : 440-F1

Product description

Mobile collection tray with hot-dip galvanized grid. This drip tray rests on two fixed castors and two swivel castors with locks. The drip tray can accommodate one 200-litre drum and has a collection volume of 241 litres.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New

Version: for 1x 200 l drum

Walls: walls closed

Wheels front: 2 swivel castors, synthetic material, 180 mm

Wheels back: 2 bearing wheels, polyamide, 180 mm

Ral colour: 2000

Length (mm): 870

Width (mm): 800

Height (mm): 1110

Weight (kg) 69

Type: Retention Basin

Material: steel

Floor: with galvanized grid

Subgroup: Mobile trays

Colour: orange

Surface treatment: painted

Internal length (mm): 800

Internal width (mm): 800

Internal height (mm): 695

Collection volume (ltr): 241
