Technical information

Productnumber : 99-1998-01GB

Product description

Elongated material container, measuring 3000x860x550 mm, a convenient solution for storing and transporting elongated materials. Although the container shows some paint damage, this does not affect its functionality. The stackable design enables efficient storage. The long material container can be combined with wheels, see article below. This allows the container to stand straight on the floor. This makes it easy to move materials from one location to another.

Specifications

Article arrangement: Used

Version: incl. insertion runners

Colour: blue

Surface treatment: painted and use damage

Width (mm): 870

Useful height (mm): 240

Type number: 1998

Type: stackable

Material: steel

Ral colour: 5002

Length (mm): 3000

Height (mm): 550

Application: stacking - not certified to hoist
