Product description

A used shelf rack with dimensions 3050x400x2000 mm is a type of storage system used for efficient storage of goods. Treated with a hot-dip galvanized zinc coating, which protects the material from corrosion. This makes the storage rack durable and suitable for use in environments where exposure to moisture or other weather conditions are possible. Divided into three sections. This allows for organized storage of different types of goods and easy access to specific items. Each section of the shelf rack has eight shelves. The shelves in the shelf rack are removable and height adjustable. This provides flexibility when storing goods of different sizes. It also makes it easy to clean or adapt the racking to changing storage needs. Suitable for use in a variety of environments, including warehouses, archives, workshops, and stores.

One set includes the following:

- 8x 200cm stands
- 18x shelves of 100x40 cm
- 36x supports of 40 cm
- 4x screws
- 1x cross brace
- 16x top caps

Specifications

Article arrangement: Used
Version: complete with accessories
Subgroup: Shelving used
Surface treatment: galvanised with signs of use
Internal width (mm): 970
Depth (mm): 400
Options: shelves adjustable and removable
EAN Code (Gtin) 8719424234923

Type: static shelving rack
Material: steel
Shelves: adjustable in height
Width (mm): 3050
Height (mm): 2000
Internal depth (mm): 360
Type number: 8047GB
