Product description

A used steel stacking bin on legs with 4 closed and profiled walls is a robust and versatile storage container. This type of stacking bin is often used for storing and transporting parts, materials, tools and other items in various industries, such as manufacturing, logistics and construction. The stacking bin is made of sturdy steel, which ensures durability and resistance to wear, impact and other forms of damage. The four closed and profiled steel walls offer protection to the bin's contents. The stacking lugs are designed to safely stack the bins on top of each other, saving valuable space during storage and transport. The storage bin stands on legs, making it easy to pick up by forklift or pallet truck. The presence of lifting lugs makes it possible to lift and move the stacking bins using lifting equipment (note! not certified for lifting), increasing flexibility and ease of use.

Specifications

Article arrangement: Used

Version: 4 sides

Walls: corrugated steel plate

Colour: various

Length (mm): 960

Width (mm): 600

Height (mm): 520

Insertion height (mm): 100

Volume (ltr): 149

Weight (kg) 38

Additional specifications: with hoisting eyes

Type: fixed construction stacking box

Material: steel

Floor: flat steel

Surface treatment: painted and use damage

Internal length (mm): 880

Internal width (mm): 500

Internal height (mm): 340

Stackable height (mm): 450

Application: stacking - not certified to hoist

Type number: 6988GB

EAN Code (Gtin) 8719424228878
