Technical information

Productnumber : 87301-H-PLAAT

Product description

Wooden bottom plate suitable for situations where additional support on the bottom of stacking racks is needed, such as in warehouses, distribution centers, and storage facilities where stacked goods need to be organized. Its use contributes to efficient and safe storage of various products. The wooden bottom plate acts as a protective layer between the goods and the metal of the stacking rack. Installing a wooden bottom plate strengthens the bottom of the stacking rack. This allows the rack to better handle the weight of stacked goods and improves the overall stability of the storage unit.

Specifications

Article arrangement: New
Version: wooden loading surface
Floor: closed
Length (mm): 1390
Height (mm): 12
Type number: 87-HP

Type: stacking rack accessories
Material: wood
Colour: colorless
Width (mm): 1020
Weight (kg) 32
EAN Code (Gtin) 8719424025897
