

## **Product description**

Used and collapsible stacking rack with perforated bottom. This versatile construction is powder coated in blue RAL 5003. Push-in brackets on both sides make the rack easy to move. When folded, the racks are extremely easy to stack and store. The load capacity is 1000 kg and the maximum stacking load is 4000 kg.

The racks are extremely suitable in environments such as automotive, garages, workshops, warehouses or distribution halls. Because the height of the racks is 2200 mm, you can put away very high stuff. All this for a more effective warehouse!

Attention! B-quality, with damage: crooked insertion bracket (see photos).

## **Specifications**

Article arrangement: Used Version: B-quality, with damage
